Pandelis Zembashis

CTO | Detail-Oriented Systems Engineer | Developer Tools & AI Product Systems

p@ndel.is | pa.ndel.is | github.com/PandelisZ | linkedin.com/in/Pandelis

EXECUTIVE SUMMARY

CTO and detail-oriented systems engineer building AI-native developer tools and product systems across CLI, browser, enterprise, and emerging desktop and IDE surfaces. At Cosine, lead product and engineering for an AI coding product and architected a portable platform that powers a single-binary Go CLI with built-in browser use, internet research, memory systems, and enterprise deployment. Previously scaled 11x.ai from 0 to $1M ARR in under six months and have shipped product platforms across TypeScript, Node.js, React, GraphQL, Go, WebAssembly, and AWS.

PROFESSIONAL EXPERIENCE

Cosine | CTO | Oct. 2023 – Present

AI coding product spanning CLI, browser, enterprise deployment, and upcoming desktop and IDE surfaces.

- Own product and engineering across Cosine's AI coding workflows, from core agent behavior to developer product surfaces.
- Architected Cosine CLI as a single Go binary with browser use, internet research, memories, and bundled ripgrep for portable distribution.
- Designed an event-bus agent loop with bidirectional UI events, enabling shared workflows across CLI, desktop, and extension surfaces and cleaner orchestration of progress, state, and tool execution.
- Built the foundation for upcoming desktop and VS Code experiences, including WebAssembly embedding and private deployment support across VPC, on-prem, and air-gapped environments.

11x.ai | Head of Engineering | Apr. 2023 – Sep. 2023

Fastest-growing UK AI startup from 0 to $1M ARR in under six months. TechCrunch coverage.

- Scaled the codebase and engineering organization behind Alice as 11x.ai grew from 0 to $1M ARR in under six months.
- Scaled outbound email and event-driven automation systems that processed millions of email chains and billions of tokens.
- Established onboarding and operating rhythms that kept the engineering team shipping through rapid seed-to-Series A growth.

Papaya | Technical Lead | Feb. 2022 – Mar. 2023

Marketplace and fleet platform helping electrify commercial and last-mile logistics. TechCrunch coverage.

- Led delivery of a fleet management platform for light electric vehicles in Next.js, React Query, and Tailwind CSS.
- Modernized the product API layer by introducing GraphQL into the Ruby on Rails backend, improving iteration across product and engineering.
- Established development cadences and product intake processes that improved execution across engineering and product.

Weezy (acquired by Getir) | Senior Software Engineer | Aug. 2021 – Jan. 2022

Rapid grocery delivery startup building warehouse, ordering, and customer systems.

- Took over the core ordering and processing monolith in Ruby on Rails, owning day-to-day delivery and forward planning during a high-growth phase.
- Built warehouse operations systems and supporting AWS and Heroku infrastructure with a focus on scale, availability, and security.

finleap connect | Senior Software Engineer | Nov. 2020 – Aug. 2021

White-label fintech platform powering digital banking products and apps.

- Built GraphQL APIs on NestJS and cross-platform clients in React Native, Apollo, Node.js, and TypeScript for a multi-tenant fintech platform.
- Led alerting and observability improvements while supporting migration from ECS to Amazon Lambda.
- Owned client-specific delivery across the stack, from GraphQL resolvers and mutations to customer-facing mobile screens.

IoT CONNCTD GmbH | Full Stack Engineer | Jul. 2019 – Nov. 2020
Cloud IoT platform unifying device protocols behind a GraphQL API.

- Built frontend interfaces, SDKs, and internal tooling for a cloud IoT platform exposing a unified GraphQL API across multiple device protocols.
- Designed authentication, update, and upstream synchronization flows using TypeScript, React, MobX, and Apollo GraphQL.

Substrakt | Software Developer | Aug. 2018 – Jun. 2019
Digital product agency building bespoke publishing, arts, and cultural web platforms.

- Built bespoke WordPress features, search experiences, and internal tooling for design-led client websites.
- Modernized the JavaScript toolchain from Gulp to Webpack, improving development and deployment workflows.

D4 Software | Software Engineer | Jun. 2017 – Jul. 2018
Product engineering consultancy building client platforms, tools, and cloud infrastructure.

- Built client-facing features and internal tools across product and platform engagements using JavaScript and .NET.
- Maintained AWS infrastructure, serverless services, databases, and virtual machines while modernizing the frontend stack with Webpack, TypeScript, and Vue.js.

SELECTED DEVELOPER TOOLING, WRITING & TALKS

Developer Tooling: Cosine CLI 1.16 Update: public write-up on built-in search, single-binary distribution, Rust plus Go integration, OS pipes, and ripgrep-level internal search architecture.
Writing: Multi-Agents; Enterprise Demands; Parallelising Development
Talks & Workshops: AWS Startups - The Future Of Work; Directus TV - Edge Computing with Pandelis; Git Intro Workshop
Public Material: pa.ndel.is projects; Devpost portfolio; Product Hunt launches incl. Cosine CLI and Cosine VS Code Extension

EDUCATION

Birmingham City University | Bachelor's Degree, Computer Science with Year in Industry | 2015 – 2019

AREAS OF EXPERTISE

Developer Tools & Product Engineering: TypeScript, Node.js, React, Next.js, GraphQL, CLI tooling, IDE integrations, WebAssembly
Agent & Orchestration Systems: AI agents, browser use, memory systems, event-driven architectures, tool orchestration, enterprise deployment
Platform: Go, AWS, Kubernetes, observability, logging, tracing, VPC, on-prem, air-gapped environments
