Pandelis Zembashis

CTO | Detail-Oriented Systems Engineer | AI Product & Platform Leader

p@ndel.is | pa.ndel.is | github.com/PandelisZ | linkedin.com/in/Pandelis

EXECUTIVE SUMMARY

CTO and detail-oriented systems engineer building AI-native products, platforms, and teams from 0 to 1 through scale across AI, fintech, mobility, and IoT. Lead product and engineering at Cosine across enterprise AI software engineering workflows and private deployment models, including VPC, on-prem, and air-gapped environments. Previously served as Head of Engineering at 11x.ai during growth from 0 to $1M ARR in under six months while scaling high-volume automation systems.

PROFESSIONAL EXPERIENCE

Cosine | CTO | Oct. 2023 – Present

Enterprise AI software engineering platform for high-security teams and demanding codebases.

- Own product and engineering for an AI software engineering platform built for complex, high-security enterprise codebases.
- Shape CLI, IDE, GitHub, Jira, and Slack workflows, aligning AI capabilities with enterprise developer and deployment needs.
- Build multi-agent and PR-based delivery patterns and private deployment support for VPC, on-prem, and fully air-gapped environments.
- Partner with frontier model providers on evaluations, benchmark positioning, and model customization, and represent Cosine through technical writing and speaking.

11x.ai | Head of Engineering | Apr. 2023 – Sep. 2023

Fastest-growing UK AI startup from 0 to $1M ARR in under six months. TechCrunch coverage.

- Scaled the codebase and engineering organization behind Alice as 11x.ai grew from 0 to $1M ARR in under six months.
- Scaled outbound email and event-driven automation systems that processed millions of email chains and billions of tokens.
- Established onboarding and operating rhythms that kept the engineering team shipping through rapid seed-to-Series A growth.

Papaya | Technical Lead | Feb. 2022 – Mar. 2023

Marketplace and fleet platform helping electrify commercial and last-mile logistics. TechCrunch coverage.

- Led delivery of a fleet management platform for light electric vehicles in Next.js, React Query, and Tailwind CSS.
- Modernized the product API layer by introducing GraphQL into the Ruby on Rails backend, improving iteration across product and engineering.
- Established development cadences and product intake processes that improved execution across engineering and product.

Weezy (acquired by Getir) | Senior Software Engineer | Aug. 2021 – Jan. 2022

Rapid grocery delivery startup building warehouse, ordering, and customer systems.

- Took over the core ordering and processing monolith in Ruby on Rails, owning day-to-day delivery and forward planning during a high-growth phase.
- Built warehouse operations systems and supporting AWS and Heroku infrastructure with a focus on scale, availability, and security.

finleap connect | Senior Software Engineer | Nov. 2020 – Aug. 2021

White-label fintech platform powering digital banking products and apps.

- Built GraphQL APIs on NestJS and cross-platform clients in React Native, Apollo, Node.js, and TypeScript for a multi-tenant fintech platform.
- Led alerting and observability improvements while supporting migration from ECS to Amazon Lambda.
- Owned client-specific delivery across the stack, from GraphQL resolvers and mutations to customer-facing mobile screens.

IoT CONNCTD GmbH | Full Stack Engineer | Jul. 2019 – Nov. 2020
Cloud IoT platform unifying device protocols behind a GraphQL API.

- Built frontend interfaces, SDKs, and internal tooling for a cloud IoT platform exposing a unified GraphQL API across multiple device protocols.
- Designed authentication, update, and upstream synchronization flows using TypeScript, React, MobX, and Apollo GraphQL.

Substrakt | Software Developer | Aug. 2018 – Jun. 2019
Digital product agency building bespoke publishing, arts, and cultural web platforms.

- Built bespoke WordPress features, search experiences, and internal tooling for design-led client websites.
- Modernized the JavaScript toolchain from Gulp to Webpack, improving development and deployment workflows.

D4 Software | Software Engineer | Jun. 2017 – Jul. 2018
Product engineering consultancy building client platforms, tools, and cloud infrastructure.

- Built client-facing features and internal tools across product and platform engagements using JavaScript and .NET.
- Maintained AWS infrastructure, serverless services, databases, and virtual machines while modernizing the frontend stack with Webpack, TypeScript, and Vue.js.

SELECTED PUBLICATIONS, TALKS & PUBLIC WORK

Articles: Multi-Agents; Enterprise Demands; Parallelising Development; Cosine CLI 1.16 Update
Talks & Media: AWS Startups - The Future Of Work; Directus TV - Edge Computing with Pandelis
Workshops: Git Intro Workshop: GitHub Campus Expert workshop covering practical Git, theory, and CLI workflow
Public Portfolio: pa.ndel.is; Devpost portfolio; Product Hunt launches incl. Cosine, Cosine CLI, Cosine VS Code Extension, and Prodlytic

EDUCATION

Birmingham City University | Bachelor's Degree, Computer Science with Year in Industry | 2015 – 2019

AREAS OF EXPERTISE

Engineering Leadership: technical strategy, org design, hiring, operating cadence, cross-functional delivery
AI & Enterprise Platform: AI agents, developer tooling, autonomous coding agents, enterprise deployment, VPC, on-prem, air-gapped environments, model evaluation
Technologies: TypeScript, GraphQL, React, Next.js, Node.js, React Native, Ruby on Rails, Python, AWS, Kubernetes, observability, CLI tooling
